

Titus Tools Slider

The Titus Slider tool allows service to oil wells to be completed safer. The Titus Slider tool and system is a easy means for flush by and service rig to move the polished rod to easily locate correct depth of pump without removing surface drive, stuffing box or composite wellhead, eliminating dangerous and environmental contamination scenarios.

Simple design allows Slider Tool to be installed above polish allowing downward movement through stuffing box and drive unit to locate tagbar and depth of pump.

A Safer Way to Service Oil Wells!

- Compact and solid design.
- Available in all standard polish rod sizes.
- Reliable operation.
- Designed for easy use.
- Easy economical maintenance with minimal training for field personnel.
- Patent Protected #TT1023/DK
